Mountain Weather Forecast

Southwest Highlands

Including Ben Nevis, Glen Coe and the rest of Lochaber, Argyll including the Isles, Loch Lomond, Trossachs and Arran

Forecast valid from 00:00 on Tuesday 27 Apr 2021 until 23:59 on Wednesday 28 Apr 2021

Forecast Issued on Monday 26 Apr 2021 at 16:13 by Met Office Aberdeen

Confidence: High confidence for the change to a cold northeasterly airstream for the week, lower confidence for the amount of showers on any given day likely to affect the Southwest Highlands.

Headline for Tuesday 27 Apr 2021: Showers turning increasingly wintery, brighter weather further west, fresh northeasterly winds.

Mountain weather hazards on Tuesday 27 Apr 2021

Blizzards Low Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** Medium Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Precipitation probability							
10%	30%	30%	30%	50%	50%	50%	50%

Forecast for Tuesday 27 Apr 2021

Weather: Cloudy overnight with some showers continuing throughout. Showers will continue on and off throughout the day and turn increasingly wintery during the day with some accumulations of snow likely on the munros near Crianlarich and Killin. The most showers will be on the more northeasterly hills with the western ranges like Arrochar and Glen Etive more sheltered with only a few showers.

Chance of cloud free mountain/hill tops above 800m: 40%, perhaps higher further west where there will be less showers.

Visibility: Visibility will be very poor at times with wintery showers and broken cloud from 500m in heavier showers in the northeast, in the west there will be more cloud breaks and perhaps a higher cloud base, perhaps scattered cloud from 700m upwards. As showers turn increasingly to snow at higher levels the visibility may reduce to less than a kilometre in the late afternoon in showers, with gusty winds at time causing temporary blizzards.

Met Office Aberdeen Meteorologist's View

A return to hazardous winter conditions by late afternoon with temporary blizzards possible in heavier showers on higher summits and strong northeasterly winds. A severe wind chill is expected during the day.

Forecast for Wednesday 28 Apr 2021

Weather: The cold northeasterly airstream will continue with showers likely to be wintery. More frequent showers will be likely on the more exposed northeasterly hills around Crianlarich. Some brighter interludes between showers and possibly some sunnier spells further west around Loch Tay.

Maximum wind: Northeasterly 10-15mph.

Chance of cloud free mountain/hill tops above 800m: 60%, more chance further west and perhaps less chance further north east.

Visibility: Cloud bases will generally be above the summits but will lower to 6-700m in wintery showers at times with visibility becoming moderate or poor temporarily.

Temperature: **Glens:** Plus 2 rising to 6 Celsius.
At 800m: Minus 2 Celsius.
Freezing level: 7-800m
